PROJECTS

Welcome To Rajasthan | HTML, CSS, JAVASCRIPT | [LIVE](#) |

- Developed a responsive website using HTML, CSS, and Javascript for a travel agency that provides detailed information about destinations and journeys.
- Implemented custom CSS styles to enhance the visual design of the website and create a unique brand identity.

Tesla Clone | React.js | [Source Code](#) |

- Designed and developed a responsive and interactive single-page web application that emulates the functionality and user interface of Tesla's website using ReactJS.
- Ensured high code quality and maintainability by following best practices such as modularizing code, utilizing React hooks, and implementing unit tests with Jest and Enzyme

TextUtils | React JS, React Bootstrap | [Source Code](#) |

- * Developed a robust and intuitive text editor using React, allowing users to create, edit, and format text documents with ease.
- * Designed a sleek and modern user interface with a customizable dark mode, giving users the ability to personalize their editing experience.

Library Management System | SQL | [Source Code](#) |

- Designed and implemented a relational database system using SQL that efficiently manages library operations such as book acquisition, cataloging, circulation, and patron management.
- Developed a user-friendly interface to interact with the database using SQL queries and stored procedures..

ACHIEVEMENTS

- State Level Hockey player.
- HackerRank – 5 Star on C++.
